**This class can genuinely change your entire strategy about which colleges to apply to and how to pay for it. Did you know that:**

- One 2-hour test as a junior can create an instant full ride to top schools across the country?
- That the most expensive schools are often the most affordable (without incorporating student loans)?
- There's a crucial time that students should take their SAT and ACT tests and when they should officially report their scores?
- That there are some excellent colleges that will charge you the same price whether you send one child to that college or up to three or four?
- That there are a number of things that students need to know and do as early as 9th grade to lay a great foundation for their future opportunities?

If these facts are surprising and encouraging, think of what we can cover in 3 hours!

With 15 years of experience in helping students shape remarkable futures, this class is geared to empower, encourage, demystify, and equip students to have affordable and exciting college options.
